Regional snow-depth response

2015–2029 mean · Experiment − CESM2-LE ensemble mean

(a) Himalayas

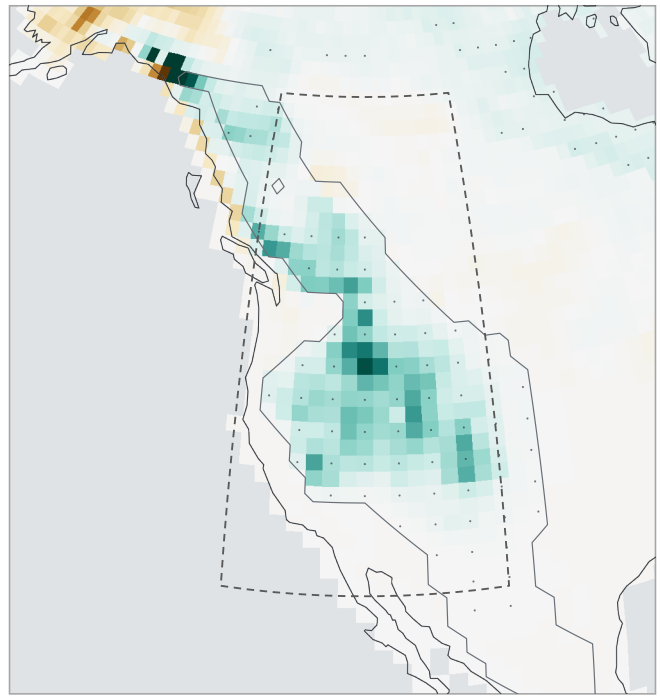

Mountain mean: +0.095 m
$|Z| \geq 1.96$: 93% of valid mountain area

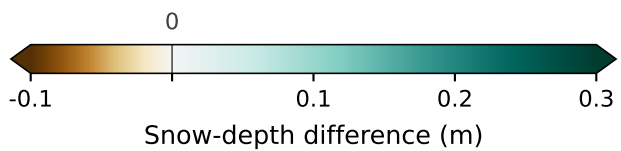

(b) Rocky Mountains

Mountain mean: +0.057 m
$|Z| \geq 1.96$: 90% of valid mountain area

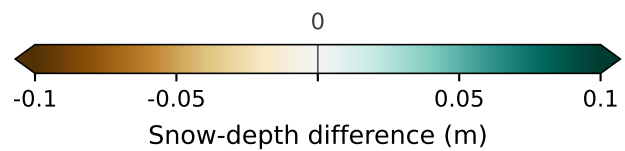

(c) Andes

Mountain mean: +0.003 m
$|Z| \geq 1.96$: 89% of valid mountain area

• $|Z| \geq 1.96$ — Elevation >1,000 m - - - Summary region No data / ocean
